PROJECTS

E-commerce Shopping Cart

- Built an e-commerce shopping cart application utilizing Object-Oriented Programming (OOP) principles and Java EE. Implemented collections to manage product data and user carts. Connected to a MySQL database using JDBC for persistent product information storage. Integrated front-end technologies, including HTML, CSS, and JavaScript, to create a responsive and interactive user interface. This project demonstrates proficiency in OOP design, data structures, database interaction, and front-end development for building real-world e-commerce functionalities.

To-Do List App

- Developed a to-do list application using HTML, CSS, and JavaScript, with a focus on intermediate-level front-end development. Implemented CRUD operations to manage tasks, utilizing JavaScript for DOM manipulation and enhancing the UI with CSS. Key features include adding new tasks, removing tasks, and marking tasks as completed.
