Profile

Enthusiastic student with a solid understanding of Java Full Stack development. Eager learner and proficient in Java programming language, HTML, CSS, and basic JavaScript. Passionate about exploring new technologies and eager to contribute to real-world projects

Projects

E-commerce Shopping Cart

- Built an e-commerce shopping cart application utilizing Object-Oriented Programming (OOP) principles and a Java EE. Implemented collections to manage product data and user carts. Connected to a MySQL database using JDBC for persistent product information storage. Integrated front-end technologies, including HTML, CSS, and JavaScript, to create a responsive and interactive user interface. This project demonstrates proficiency in OOP design, data structures, database interaction, and front-end development for building real-world e-commerce functionalities

To-Do List App

- Developed a to-do list application using HTML, CSS, and JavaScript, with a focus on intermediate-levelfront-end development. Implemented CRUD operations to manage tasks, utilizing JavaScript for DOMmanipulation and enhancing the UI with CSS. Key features include adding new tasks, removing tasks,and marking tasks as completed.
